

Our combo-vacs are pragmatic solutions for diverse tasks. Featuring best-in-class frost resistance, usability and durability, our combo-vacs will get the job done. The Eco Combi models are all-rounders delivering high performance at a practical size.

Efficient design and robust construction allow our combo-vacs to be used in the harshest conditions. We offer a range of tank sizes and pump options along with equipment variants and accessories.

Due to our innovative manufacturing we can build our equipment onto any chassis as well as offer demountable versions. We can even remove equipment from an existing vehicle and transfer it onto a new chassis. Attention to detail and appearance are also important to us, with features including LED lighting being standard.

All our products are custom-made in Finland.

Technical specifications (6+3 model)

Chassis and frame

- 16T Volvo FL4x2
- 6.86m length

Sludge tank

- 6000 litres

Water tank

- 3000 litres

Vacuum pump

- Jurop PVT 200 HDR 40 kW

Water pump

- Pratissoli KF 30, 200 bar, 106 litres/min, 40 kW

Equipment cabinet

- diesel heater
- thermal insulation
- hose reel 1 pcs 1/2" 80m, with hose feeder and hose port to the rear of the vehicle

Winter operation

- pumps situated in heated and insulated equipment cabinet
- heated rear valves
- 110 kW water boiler

Storage

- hose platforms with LED lighting
- containers below hose platforms
- hose storage hooks at vehicle rear

Control panel and radio control

- intuitive controls, can use while wearing gloves
- user-friendly, functions programmed to requirements
