Our combo-vacs are pragmatic solutions for diverse tasks. Featuring best-in-class frost resistance, usability and durability, our combo-vacs will get the job done. The Micro Combi models are especially suited for work in weight or size restricted spaces.

Practical design and robust construction allow our combo-vacs to be used in the harshest conditions. We offer a range of tank sizes and pump options along with equipment variants and accessories.

Due to our innovative manufacturing we can build our equipment onto any chassis as well as offer demountable versions. We can even remove equipment from an existing vehicle and transfer it onto a new chassis. Attention to detail and appearance are also important to us, with features including LED lighting being standard.

All our products are custom-made in Finland.
